PREFACE

This summary contains additional information on the "new" and "change" intelligence targets listed in the Mission Index (MI) report for this mission. A "new" target is either a newly identified installation or a known installation which is being reported for the first time by NPIC. A "change" target is an installation where a major change is observed in facilities. Also included under "change" targets are those installations where analysis of current photography furnishes more precise information.

Items in this report are arranged in two sections --

The first section provides a description of new targets.

The second section provides a description of change targets.

Targets listed as "new" or "change" in the MI which are not included in this report have been omitted because further analysis negated the identification of the "new" targets or revealed no significant change in the "change" targets.

Targets are arranged 1) by country, 2) within the country according to subject, 3) within the subject by WAC area, and 4) within the WAC area by geographic coordinates in ascending order. The map base used (when available) for the derivation of coordinates in the MI is the latest edition of the US Air Target Chart, Series 200.

The header line for each target contains, reading from left to right, the installation name, the geographic coordinates, the World Aeronautical Chart number, the Bombing Encyclopedia (BE) number, and the NPIC target number.

The COMOR target number, when available, appears above the photo reference data.

Photo reference data includes all photo references, and symbols denoting the limiting conditions, photo interpretability, target coverage, and the mode.

Symbols for limiting conditions affecting photography are C (Clear), SC (Scattered Cloud Cover), HC (Heavy Cloud Cover), H (Haze), CS (Cloud Shadow), S (Snow), O (Obliquity), SD (Semidarkness), GC (Ground Cover), CF (Camouflage), and GR (Ground Resolution).

Interpretability of the photography is categorized as G (Good), F (Fair), or P (Poor). Target coverage is denoted by the symbols T (Total) or PT (Partial). The mode of coverage is indicated by ST (Stereo), PS (Partial Stereo), or NS (Non-Stereo).

For the convenience of the user, an index to all targets is included following Section II. Targets in the index are arranged alphabetically within a country.

<u>MILITARY INSTALLATIONS</u> SEVERODVINSK NAVAL BASE AND SHIPYARD 402 FACILITIES INCLUDE A TRANSVERSER SYSTEM NOW LEADING FROM THE SUB-ASSEMBLY BUILDING LOCATED JUST ENE OF THE MAIN CONSTRUCTION HALL TO THE EAST END OF THIS HALL. COFFERDAM IN FRONT OF CAISSON TO WET DOCK REMAINS UNBROKEN. CHANGES AT THE PROBABLE NUCLEAR SUBMARINE SPECIAL SUPPORT FACILITY ON YAGRY ISLAND CONSIST OF A PROBABLE GABLE ROOF ADDED TO THE MONITOR EXTENDING ACROSS 4 ENCLOSED VERTICAL TANKS. CONSTRUCTION IS CONTINUING ON THE 4 UNROOFED VERTICAL TANKS. AN UNIDENTIFIED CIRCULAR OBJECT IS VISIBLE ON THE ROOF OF THE PROCESSING BUILDING NEAREST THE ENCLOSED VERTICAL TANKS. NO OTHER CHANGES OBSERVED. VESSELS -- ON UNFLOODED SHALLOW SIDE OF MAIN LAUNCH BASIN -- 2 PROBABLE N-CLASS SSN AND 1 POSSIBLE BARGE LINED UP WITH NORTH DOOR OF THE LARGE CONSTRUCTION HALL. ALONGSIDE FITTING-OUT QUAY, MAIN YARD -- 3 PROBABLE LARGE SS WITH FLOATING SCREENS OUTBOARD AND 1 UNIDENTIFIED SS IN LARGE FLOATING DOCK PERPENDICULAR TO QUAY. ALONGSIDE FITTING-OUT QUAY, YAGRY ISLAND REPAIR FACILITY (NORTH YARD) -- 2 UNIDENTIFIED SS, 1 LARGE FLOATING DOCK CONTAINING 1 LARGE SS AND 1 POSSIBLE SUBMARINE. IN NIKOLSKOYE ESTUARY -- 1 PROBABLE J-CLASS SSG. ONE LARGE POSSIBLE SURFACE COMBATANT IS ALONG WEST QUAY.	6434N 03949E	0092	25X1	7-A
